# User Manual - Android:

Login Page

The user sees this page when he/she opens the application. If the user has already an account, he/she can enter his/her identifier and password, click the login button and successfully log in.

Otherwise, the user can register for the app by clicking register button.

Registration Page

The user is navigated to this page after pressing register button in the starting page. The user can register by entering the fields(email,password,identifier i.e). The birthday should in form of

YYYY-MM-DD. After filling the fields, when the user presses the register button, the user is registered for the application. Please note that the user can only enter one sport type.(basketball,football,tennis,handball etc.)

Home Page

After the user logs in, the user sees the Main Page above. Main page consists of three parts: Home, Search and Profile. There are three tabs in tabbar and initially the user is navigated to the Home page(a part of Main Page). In home page the user can see events he/she is attending and the events created by him/her. The user can navigate to the Event Detail Pages by clicking on them.
In home page, the user can log out by clicking the Logout button.
In home page, the user is able to create a new event by clicking the Create New Event Button.

Event Creation Page 1

This is the event creation page. The user should fill the fields above to create a new event. The user is also have to select the event location by clicking Select event location text. After clicking that text, the user is navigated to a map, where he can choose the location of the event by pressing and holding for a little moment on a point on the map. Here is the map:

Event Creation - choosing location

After the user fills the fields on event creation page and chooses a location for the event, he is navigated to the badge selection screen, where the user can choose badges for the event. If there are specific badges for that sport in the system, the system can only select these badges because only they are viewed. If there are no specific badges for that sport in the system, the user can select badges he/she wishes from all badges in the system. The user clicks on badges he/she wishes to choose and then clicks “Done” button. Here are the badges for football:

Event creation- badge selection

On the home page, when user clicks on any event(either created by him/her or an event he/she is participating to), the user is navigated to Event Detail Page. In the event detail page, all the information about the event are shown. The user also can see the location of the event by clicking “Click to see the location on the map” button. The users can declare themselves as spectator or become interested in the Event Detail Page. Event Detail Page:

Event Detail Page 1

Event Detail Page 2

If the user is the creator of the event, There is a button named Show interested users in event page. The user can reject or accept the interested users for that event.

Event Detail Page 3- rejecting and accepting interesting users

By clicking green tick, the creator accepts that user. And by clicking the red minus, the creator rejects that user. After pressing done, the acception/rejection operation is finished.

The user can search events and users on Search Page. The user can choose the search type on the dropdown on right top of the search page.

Search page 1- Search type dropdown

The user can filter the events however he/she wishes with different filters: event name, event sport type, min and max skill level, city, country and Location of the event. By clicking Search event with Map button, the user is navigated to map, where he/she will two locations by pressing and holding for a little moment on points. Please note that user should first select the point on top left, not right bottom, otherwise the search does not work properly. The events will

between these two locations(points) will be filtered and be showed to the user when the user presses “Search” button.

Event Search- Map based search(selecting location area)

The red marker is a default marker which the user should ignore. It is only there to ease the zooming in operation. In this case above, the first location is chosen by the user, which is shown with blue marker. The user now will select the second location, on the bottom left of that blue

marker and the location selection operation is finished.
After clicking search button, the user is navigated to another page, where searched events are listed.

Event Search-Searched Events

By clicking on any event, the user is navigated to that event's detail page. (Please see event detail page images above)

The user can also search other users by entering the username.

User search

After clicking Search button, the users which contain the search keyword are listed. The user can navigate to the User Detail Page of the users by cilcking on any user.

User search - results

User Detail Page

On user detail page, the user can follow the user, unfollow the user, see his/her badges, the users he/she follows and his/her followers. The user can also block the user.

The user can navigate to his/her profile page by clicking the “Profile”, the third tabbar below.

Profile Page of user

In Profile Page, the user can update his/her information and also delete his/her profile.
